Arkose
Traverse Log Beam

P-PE-TTI-1969

The Arkose Traverse Log Beam provides a simple but effective balance challenge that encourages children to carefully navigate along a natural Robinia timber beam. Traversing helps develop balance, coordination, spatial awareness and core stability while giving children opportunities to build confidence through active play. The natural form and character of Robinia timber creates an organic playground feature that works well independently or as part of a wider trim trail, climbing course or natural play environment.

Suitable for ages 5+

KEY MATERIALS

Robinia (Black Locust / False Acacia) is an extremely durable, rot resistant hardwood timber, with no need for treating. Each piece is sanded to create a smooth finish.

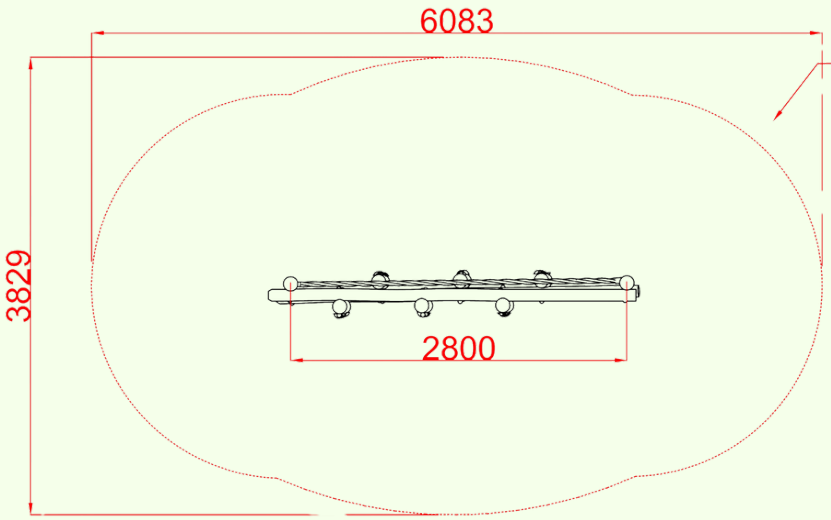

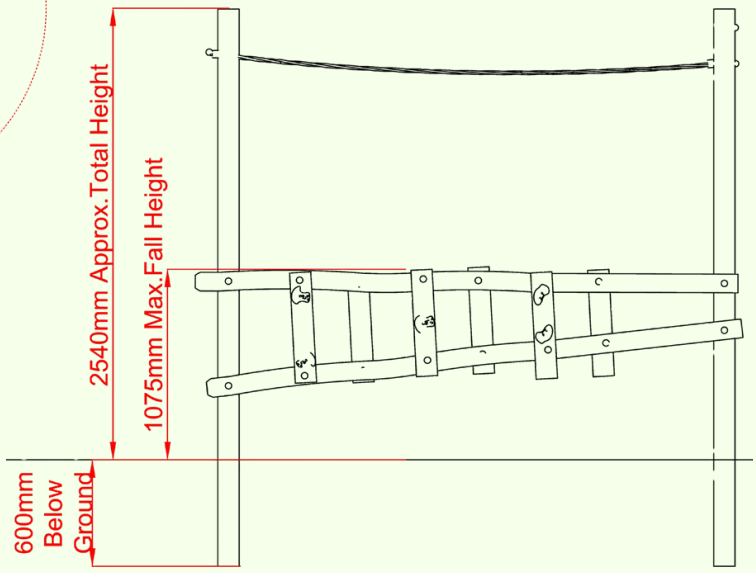

Ropes used are polypropylene covered with a galvanized steel core. The rope is 16mm in thickness, and secured by a tamper-proof plastic connecting point, that's hydraulicly pressed into place.

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

DRAWINGS

Free fall/surfacing area - Approx. 19m2
Max fall height - 1075mm

Contact us if loose-fill flooring is used (e.g., bark), as an extra 300mm will need to be allowed for into ground installation.
