Crowstone
Hanging Disc Crossing

P-PE-TTI-4548

The Crowstone Hanging Disk Crossing challenges children to travel across a series of suspended stepping discs that move beneath them as they play. Each step requires balance, coordination, body control and careful movement, creating an engaging active play experience with an added element of challenge. Supported by naturally durable Robinia timber, the crossing is ideal for natural playgrounds, schools, parks and adventure trails where children can develop physical skills and confidence through play.

Suitable for ages 5+

KEY MATERIALS

Robinia (Black Locust / False Acacia) is an extremely durable, rot resistant hardwood timber, with no need for treating. Each piece is sanded to create a smooth finish.

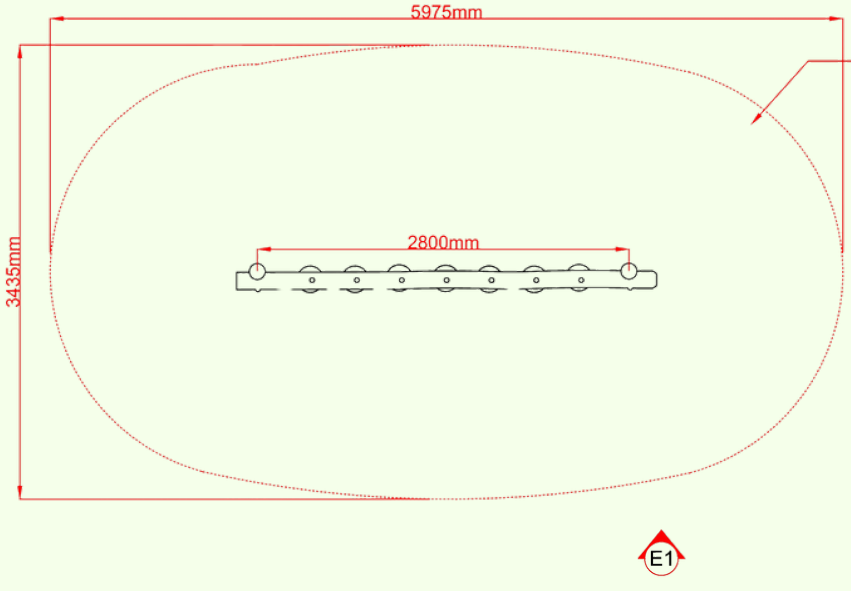

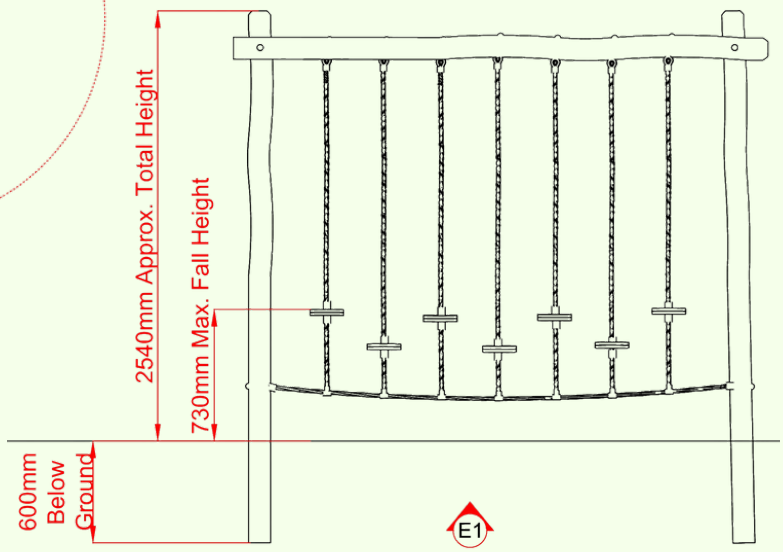

Ropes used are polypropylene covered with a galvanized steel core. The rope is 16mm in thickness, and secured by a tamper-proof plastic connecting point, that's hydraulicly pressed into place.

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

DRAWINGS

Free fall/surfacing area - Approx. 18m2
Max fall height - 730mm

Contact us if loose-fill flooring is used (e.g., bark), as an extra 300mm will need to be allowed for into ground installation.
