Ferricrete
Twisted Log Beam

P-PE-TTI-0705

The Ferricrete Twisted Log Beam turns a traditional balance beam into a more demanding active play challenge. Its changing timber form encourages children to adjust their footing and body position as they traverse from one end to the other, helping develop balance, coordination, core strength and confidence. Handcrafted from naturally durable Robinia timber, it creates an organic, natural playground feature that works particularly well within climbing routes, adventure trails and Robinia trim trail designs.

Suitable for ages 5+

KEY MATERIALS

Robinia (Black Locust / False Acacia) is an extremely durable, rot resistant hardwood timber, with no need for treating. Each piece is sanded to create a smooth finish.

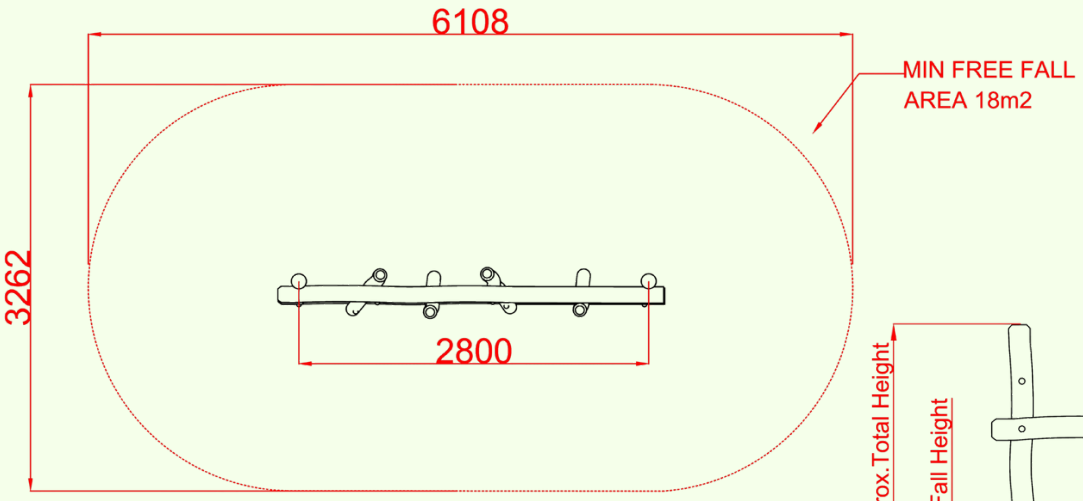

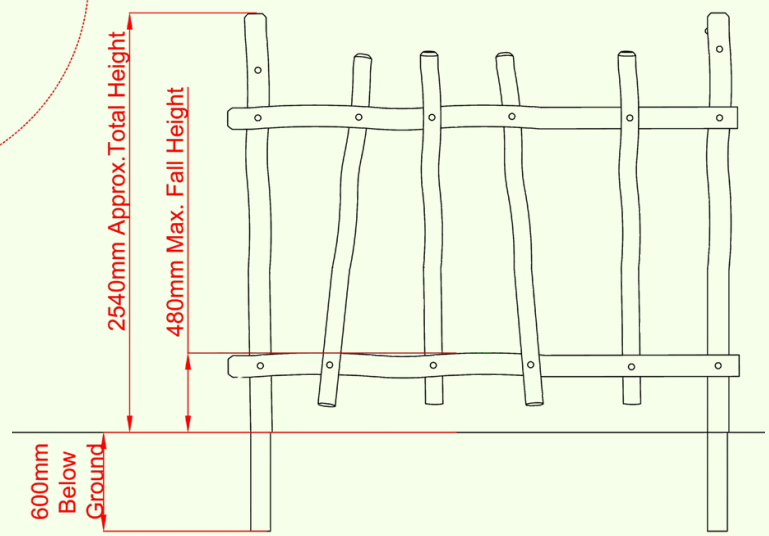

Ropes used are polypropylene covered with a galvanized steel core. The rope is 16mm in thickness, and secured by a tamper-proof plastic connecting point, that's hydraulicly pressed into place.

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

DRAWINGS

Free fall/surfacing area - Approx. 18m2
Max fall height - 480mm

Contact us if loose-fill flooring is used (e.g., bark), as an extra 300mm will need to be allowed for into ground installation.
