Fireclay
Monkey Bars

P-PE-TTI-5940

The Fireclay Monkey Bars provide a classic upper-body challenge within a natural Robinia playground design. Children can swing and traverse from bar to bar, developing grip strength, upper-body strength, coordination and confidence through active play. Handcrafted using naturally durable Robinia timber, the Fireclay works well as a standalone piece of playground equipment or as part of a larger climbing course or Robinia trim trail for schools, parks and outdoor play spaces.

Suitable for ages 5+

KEY MATERIALS

Robinia (Black Locust / False Acacia) is an extremely durable, rot resistant hardwood timber, with no need for treating. Each piece is sanded to create a smooth finish.

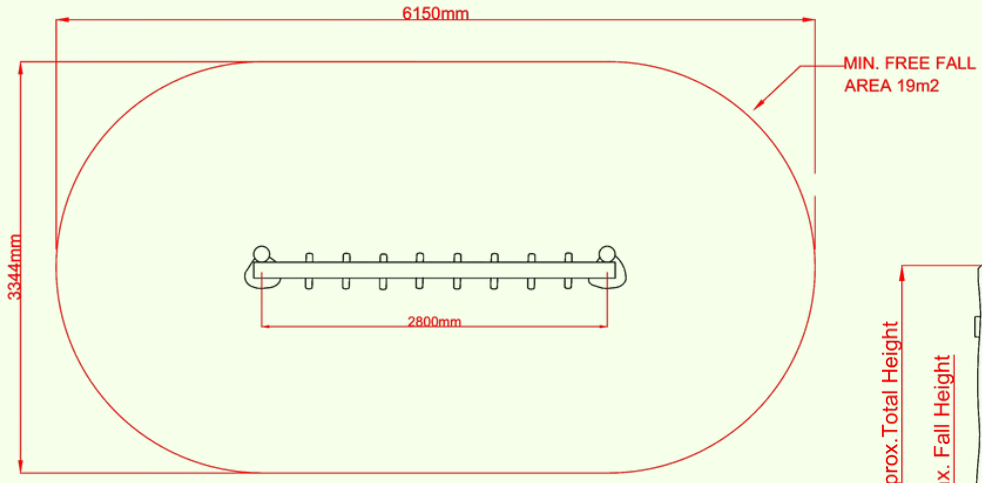

Ropes used are polypropylene covered with a galvanized steel core. The rope is 16mm in thickness, and secured by a tamper-proof plastic connecting point, that's hydraulicly pressed into place.

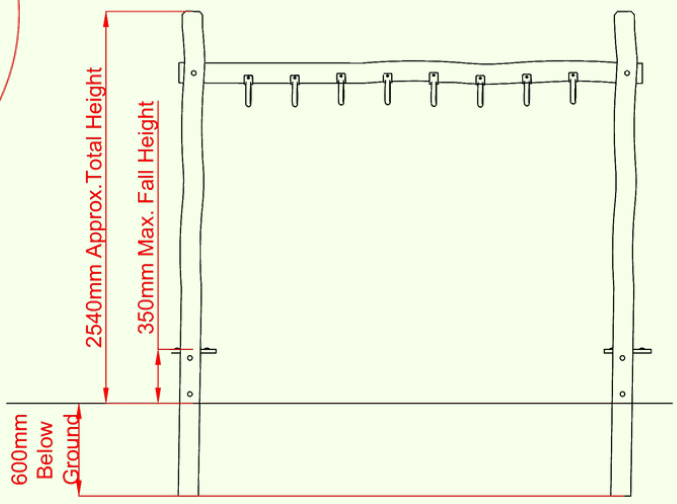

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.
