Ironstone
Rope Net Crossing

P-PE-TTI-8565

The Ironstone Rope Net Crossing combines climbing, balancing and traversing within one engaging piece of active play equipment. Children navigate their way across the rope net using both their hands and feet, developing coordination, grip strength, balance and whole-body strength. Framed with naturally durable Robinia timber, its combination of timber and rope creates a challenging natural playground feature suitable for schools, parks and larger Robinia climbing or trim trail configurations.

Suitable for ages 5+

KEY MATERIALS

Robinia (Black Locust / False Acacia) is an extremely durable, rot resistant hardwood timber, with no need for treating. Each piece is sanded to create a smooth finish.

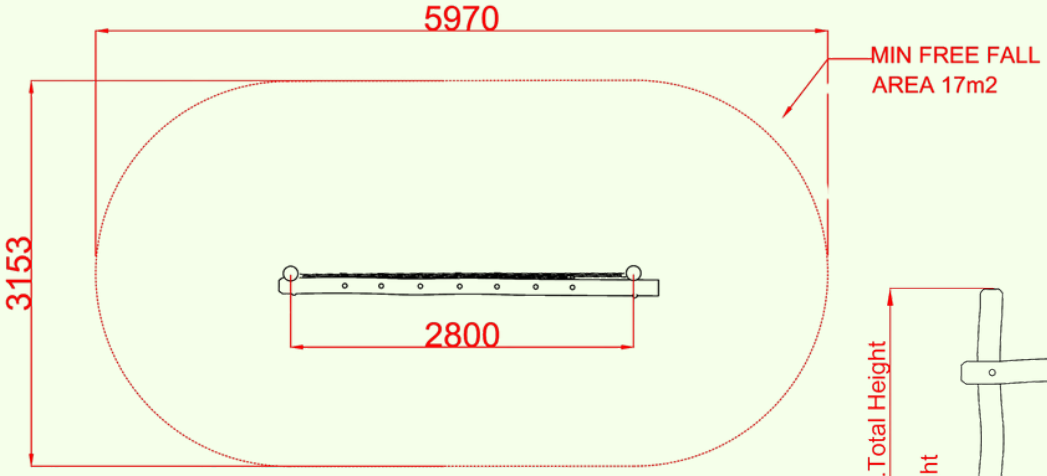

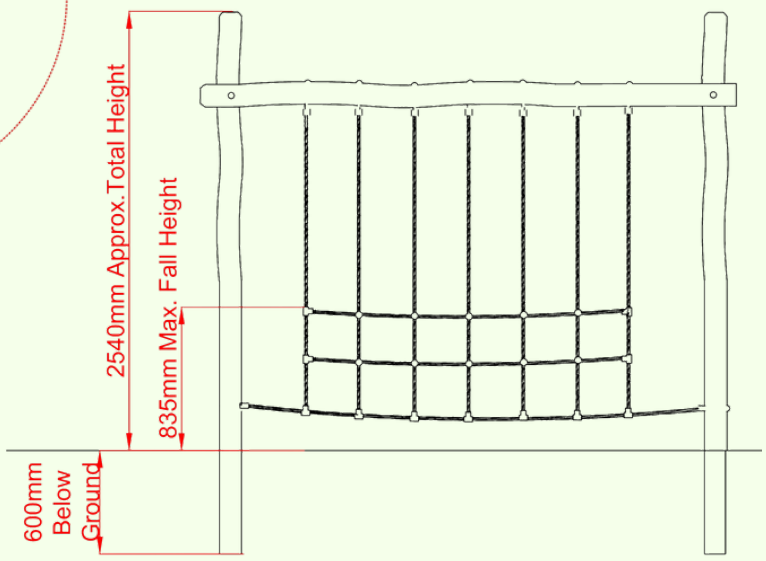

Ropes used are polypropylene covered with a galvanized steel core. The rope is 16mm in thickness, and secured by a tamper-proof plastic connecting point, that's hydraulicly pressed into place.

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

DRAWINGS

Free fall/surfacing area - Approx. 17m2
Max fall height - 835mm

Contact us if loose-fill flooring is used (e.g., bark), as an extra 300mm will need to be allowed for into ground installation.
