Limestone
Traverse Disc Crossing

P-PE-TTI-5014

The Limestone Traverse Disc Crossing creates a challenging route for children to step, balance and travel between suspended discs. Handcrafted from naturally durable Robinia timber, it encourages active play while developing balance, coordination, core stability and confidence. The changing movement beneath each step adds an extra physical challenge, making it a great addition to school playgrounds, parks and natural play spaces, either as a standalone activity or within a larger Robinia trim trail.

Suitable for ages 5+

KEY MATERIALS

Robinia (Black Locust / False Acacia) is an extremely durable, rot resistant hardwood timber, with no need for treating. Each piece is sanded to create a smooth finish.

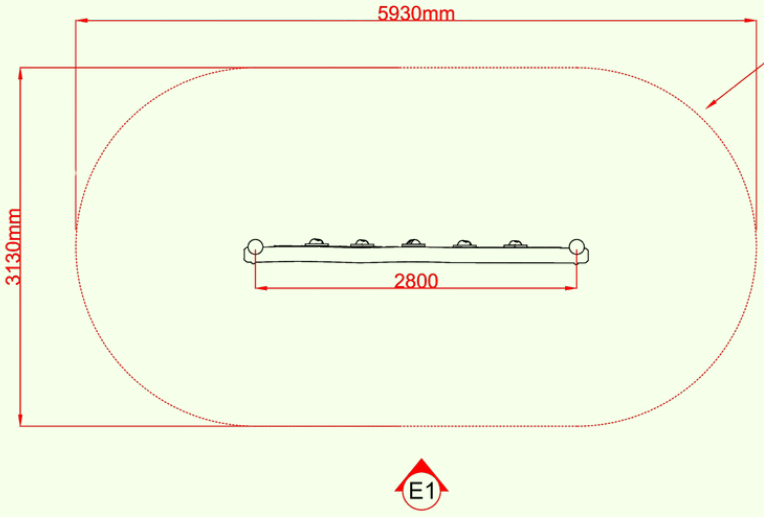

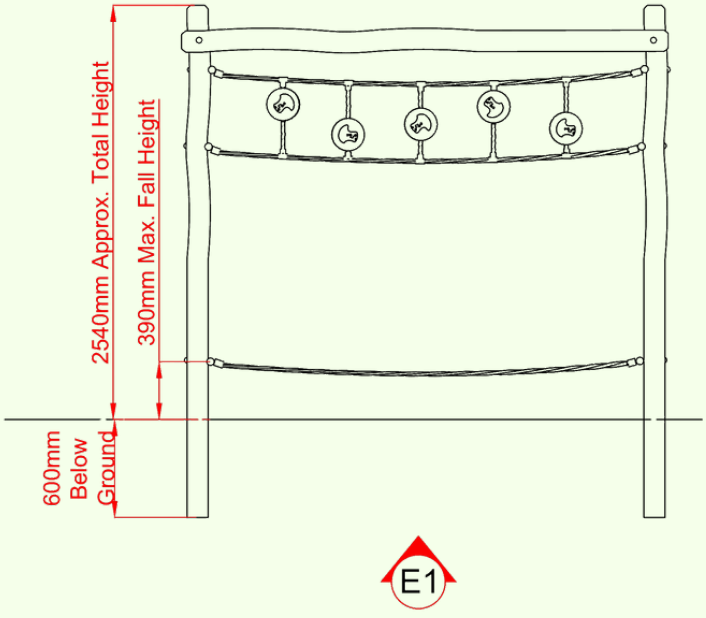

Ropes used are polypropylene covered with a galvanized steel core. The rope is 16mm in thickness, and secured by a tamper-proof plastic connecting point, that's hydraulicly pressed into place.

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

DRAWINGS

Free fall/surfacing area - Approx. 17m2
Max fall height - 390mm

Contact us if loose-fill flooring is used (e.g., bark), as an extra 300mm will need to be allowed for into ground installation.
