Log Ladder Crossing

P-PE-CE-6835

The Log Ladder Crossing challenges children to climb and travel across a series of timber rungs while developing confidence through active play. Handcrafted from durable FSC-certified timber, the crossing encourages balance, coordination, grip strength and whole-body movement as children navigate from one side to the other. Ideal for schools, playgrounds and outdoor activity areas, it works well as a standalone physical challenge or as part of a larger timber trim trail or active play course.

Suitable for ages 2+

KEY MATERIALS

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

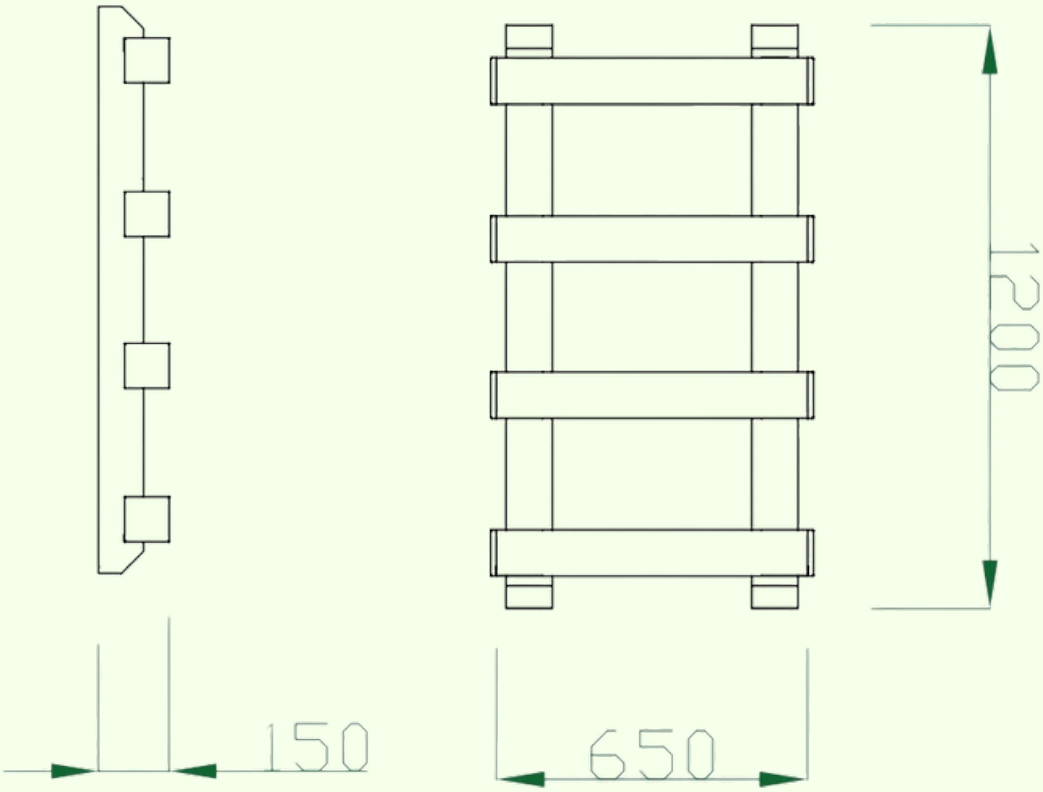

18mm thick, anti-slip mesh phenolic birch plywood sheets are fitted to reduce the risk of slips and falls.

HDPE sheets are thermoplastic materials that are used in many of our products. The versatile properties, including UV stability, make it resistant to fading, moisture, weather, stain and graffiti.
