Manifold
2.4m Seesaw

P-PE-S-5335

The Manifold 2.4m Seesaw is a classic and lively addition to any outdoor play space, designed to bring children together through movement, balance, and shared fun. Crafted from durable natural robinia timber, this timeless playground favourite encourages children to engage in active play, whether they're soaring up and down, testing their rhythm, or simply enjoying the excitement of playing together. Its simple yet engaging design makes it a perfect feature for creating memorable outdoor experiences.

Suitable for ages 4+

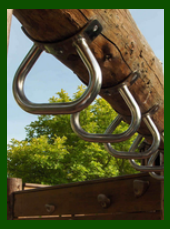

KEY MATERIALS

Robinia (Black Locust / False Acacia) is an extremely durable, rot resistant hardwood timber, with no need for treating. Each piece is sanded to create a smooth finish.

The seesaw bearing is a robust stainless steel component engineered to serve as the central pivot of a playground seesaw, securely fitted between two support posts.

Steel hand grips offer a durable and weather-resistant grip for our outdoor playground equipment.

The heavy-duty rubber shock absorbers fit round and flat seesaw beams, cushioning impacts and enhancing safety and durability.

DRAWINGS

Free fall/surfacing area - Approx. 17m2

Contact us if loose-fill flooring is used (e.g., bark), as an extra 300mm will need to be allowed for into ground installation.
