Sand and Water Discovery Station

P-PE-WP-2185

The Sand and Water Discovery Station brings two popular forms of sensory play together within one engaging playground feature. Handcrafted from naturally durable Robinia timber and installed securely into the play space, children can pour, scoop, transfer and experiment with sand and water across the different activity areas. Open-ended play encourages creativity, collaboration and problem-solving while supporting fine motor skills, coordination and an understanding of cause and effect. Ideal for nurseries, EYFS settings, schools and natural play environments.

Suitable for ages 2+

KEY MATERIALS

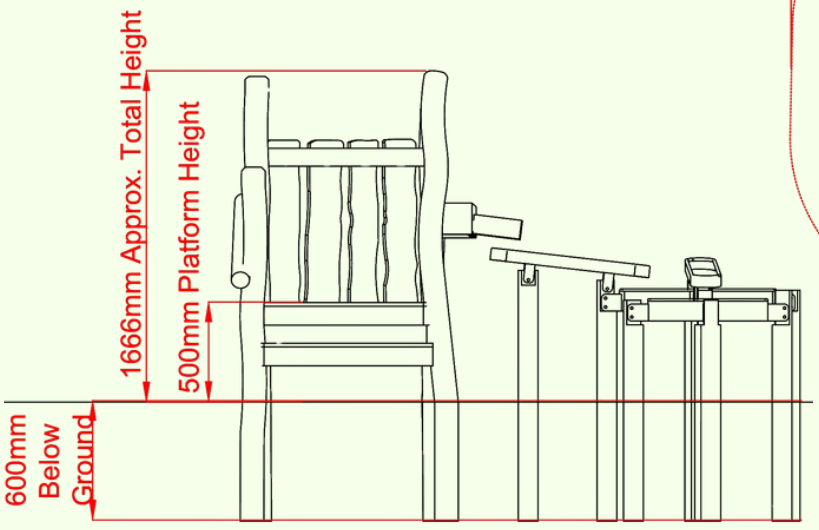

Robinia (Black Locust / False Acacia) is an extremely durable, rot resistant hardwood timber, with no need for treating. Each piece is sanded to create a smooth finish.

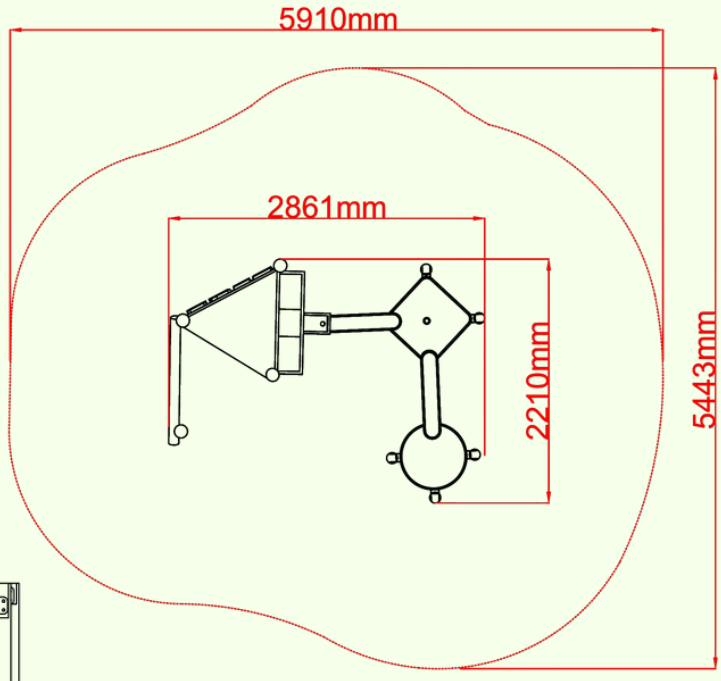

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

DRAWINGS

Contact us if loose-fill flooring is used (e.g., bark), as an extra 300mm will need to be allowed for into ground installation.
