Siltstone
Hanging Log Crossing

P-PE-TTI-0069

The Siltstone Hanging Log Crossing creates a dynamic balance challenge using suspended Robinia logs that move as children travel across them. The changing surface encourages children to adapt their movement, control their body position and problem-solve their route, supporting balance, coordination, core strength and confidence. Made using naturally durable Robinia timber, this active play feature brings movement and physical challenge to school playgrounds, parks and Robinia trim trails while maintaining a natural, organic appearance.

Suitable for ages 5+

KEY MATERIALS

Robinia (Black Locust / False Acacia) is an extremely durable, rot resistant hardwood timber, with no need for treating. Each piece is sanded to create a smooth finish.

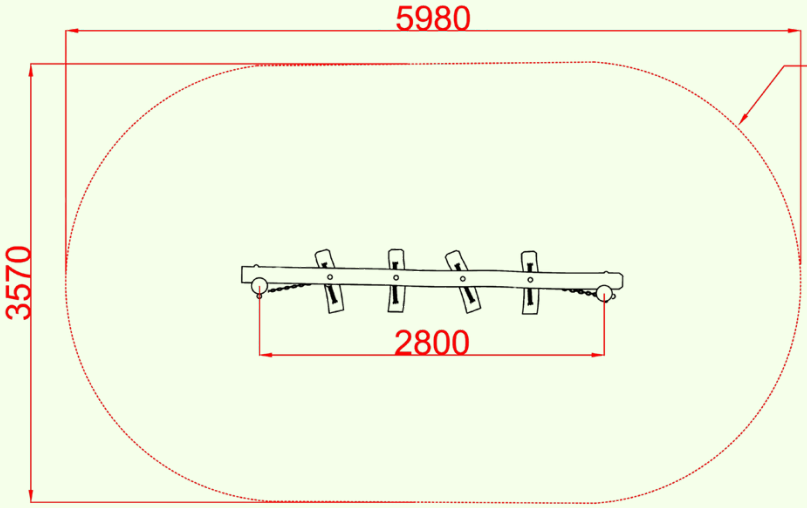

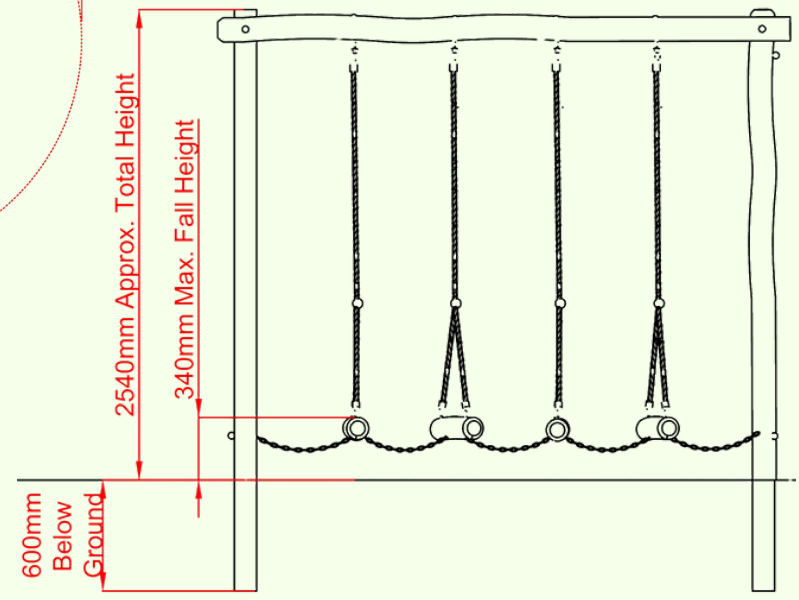

Ropes used are polypropylene covered with a galvanized steel core. The rope is 16mm in thickness, and secured by a tamper-proof plastic connecting point, that's hydraulicly pressed into place.

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

DRAWINGS

Free fall/surfacing area - Approx. 19m2
Max fall height - 340mm

Contact us if loose-fill flooring is used (e.g., bark), as an extra 300mm will need to be allowed for into ground installation.
