Toadstone
Rope Crossing with Handholds

P-PE-TTI-5065

The Toadstone Rope Crossing with Handholds provides an engaging traversing challenge where children use both their hands and feet to make their way across. The combination of a rope footway and supportive handholds encourages balance, coordination, grip strength and whole-body control through active play. Naturally durable Robinia timber supports the structure and gives it a distinctive organic appearance, making the Toadstone an ideal addition to school playgrounds, parks, climbing courses and Robinia trim trails.

Suitable for ages 5+

KEY MATERIALS

Robinia (Black Locust / False Acacia) is an extremely durable, rot resistant hardwood timber, with no need for treating. Each piece is sanded to create a smooth finish.

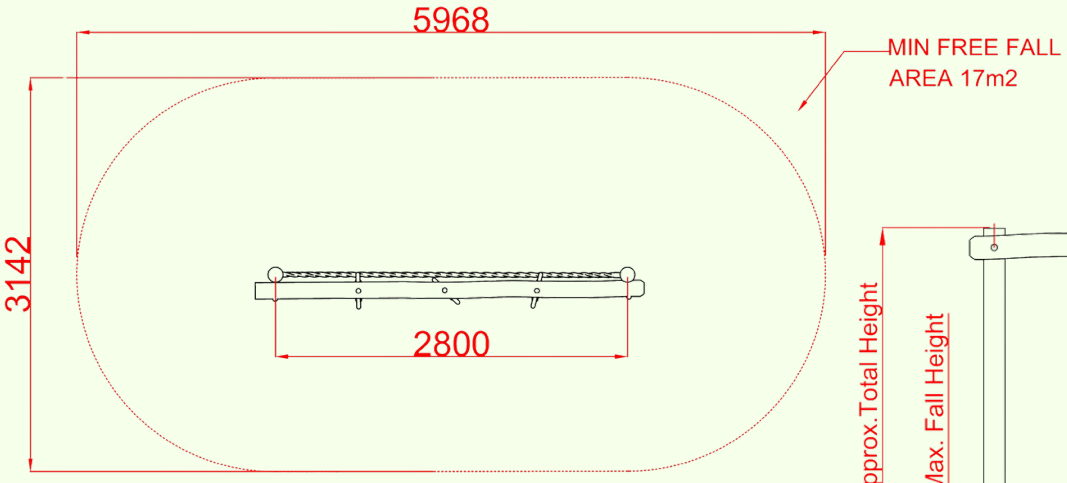

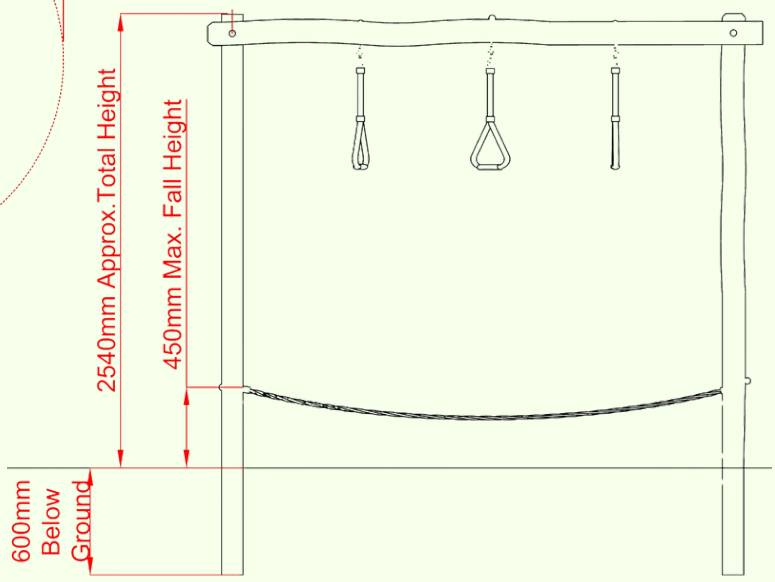

Ropes used are polypropylene covered with a galvanized steel core. The rope is 16mm in thickness, and secured by a tamper-proof plastic connecting point, that's hydraulicly pressed into place.

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

DRAWINGS

Free fall/surfacing area - Approx. 17m2
Max fall height - 450mm

Contact us if loose-fill flooring is used (e.g., bark), as an extra 300mm will need to be allowed for into ground installation.
