Water Flow Discovery Station

P-PE-WP-0477

The Water Flow Discovery Station creates an immersive water play experience where children can collect, pour, transport and investigate the movement of water. Handcrafted from naturally durable Robinia timber and installed securely into the play space, the station combines different levels and interactive elements to encourage experimentation and collaborative play. Water play supports coordination, problem-solving, fine motor development and an understanding of cause and effect, making it an engaging addition to nurseries, EYFS settings, schools and natural playground environments.

Suitable for ages 2+

KEY MATERIALS

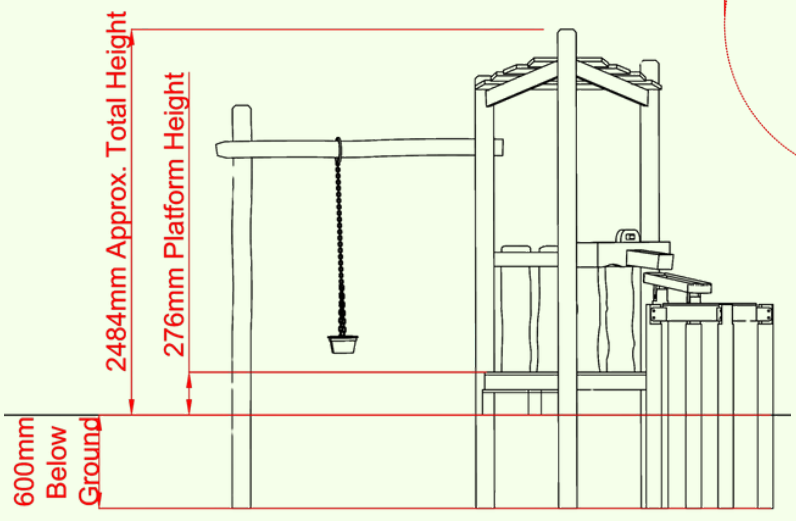

Robinia (Black Locust / False Acacia) is an extremely durable, rot resistant hardwood timber, with no need for treating. Each piece is sanded to create a smooth finish.

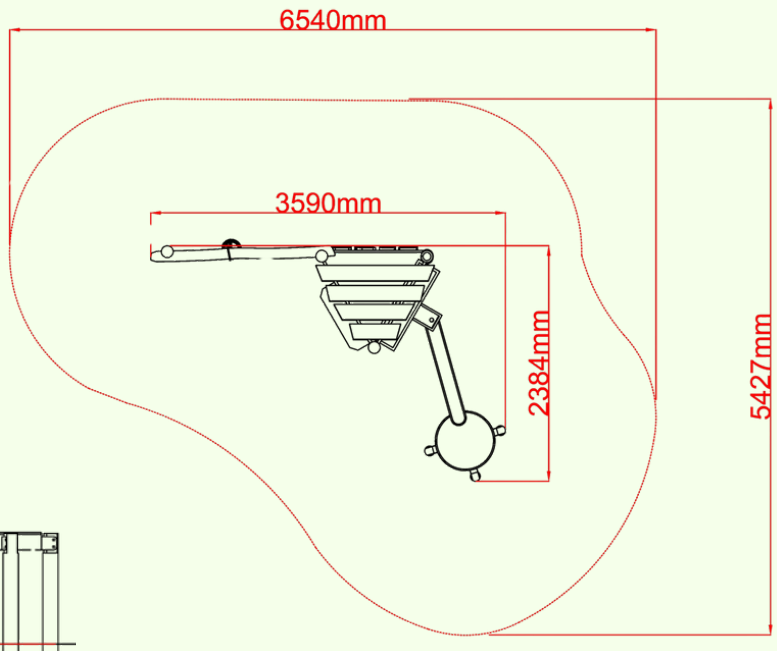

All our timbers are pressure-treated with a chrome-free and arsenic-free preservative which protects against decay and insect attack. Each piece is sanded to create a smooth finish.

DRAWINGS

Contact us if loose-fill flooring is used (e.g., bark), as an extra 300mm will need to be allowed for into ground installation.
